Safety Management Techniques

Monday – Thursday, March 8 – 11, 2010

8:00 am – 4:30 pm

Let us help you and your company to achieve excellence in your safety and health efforts. Attend this essential and practical course in safety management techniques.

Training Goal

Upon completion of the Safety Management Techniques course, you'll be able to use new knowledge and skills to influence the safety and health efforts at your facility/company.

Who Should Attend?

Attend the Safety Management Techniques course if you are coordinating, supervising, or managing safety and health efforts at your facility/company. Designed for the safety leader, this course meets the needs of safety and health committee leaders, supervisors, and middle/upper managers.

Why Should You Attend?

Based on sound safety, management, quality, and performance technology principles, Safety Management Techniques is a 4 day course that will help you manage employees and/or projects in your safety and health efforts. Program content, case studies, exercises, and discussions focus on the practical knowledge and skills required to effectively deal with safety-related organizational practices, environmental conditions, and human relations issues.

You'll examine your function and leadership role as a safety and health practitioner as special knowledge and skills are covered in this course, including:

- Interviewing and consulting
- Addressing individual and organizational dynamics
- Conducting safety audits
- Influencing and managing change
- Working with a safety and health committee
- Budgeting for safety and health efforts

As a special review activity, you'll assess your own organization's safety and health practices and create a management plan that you can take back to your facility for implementation.

4 Day Course • 2.6 NSC CEUs

Fee: Member -- \$1,195 • Nonmember -- \$1,550

Advanced registration required, call for details.

Prices and dates subject to change without notice.
