REGULATORY COMPLIANCE COURSE

Coaching the Lift Truck Operator Train-the-Trainer

Friday, August 6, 2010

8:00 am

Learn how to meet OSHA's new Powered Industrial Truck Standard using the National Safety Council's *Coaching the Lift Truck Operator™* training program.

The new OSHA standard for General Industry, 29 CFR 1910.178(l), for Powered Industrial Trucks, Material Handling & Storage, Operator Training, became effective on March 1, 1999. OSHA standards 29 CFR 1915.120 for Shipbuilding and 29 CFR 1926.602(d) for Construction were also amended to align with the General Industry mandate. The final standard requires formal instruction, practical training, and evaluation of operator performance.

**Does your current training program meet these new standards?
Are your lift truck operators being properly trained and evaluated?**

Answer "YES" to both these questions with Coaching the Lift Truck Operator™. Now you must comply with OSHA's new training standards, aimed at greatly reducing those injury statistics and related costs. At this seminar you'll become familiar with Coaching the Lift Truck Operator™, a comprehensive program updated to cover all aspects of lift truck operation.

WHAT YOU'LL LEARN AT THIS ONE-DAY SEMINAR

- Understand the new OSHA Standard and what you must do to be in full compliance.
- Recognize skills and techniques required for safe powered industrial truck operation and maintenance.
- Develop a complete in-house training program using the included 2 videos, fully scripted leader's guide, color transparencies, checklist, and exam.
- Design exercises to evaluate actual "hands-on" performance by your operators.
- Educate non-operators on how to work safely around powered industrial trucks.
- Discuss principles of learning, adult learning techniques, use of audiovisuals, platform skills, effective skills training, improved student participation, curriculum design, and motivation.

YOU'LL TAKE THE PROGRAM WITH YOU

You also receive the teaching materials you need to get started with the program back at your facility (\$450 value). Additional attendees from the same organization may attend at a reduced fee and receive only the operator response book.

1/2-Day Course

Fee: Member \$450; Non-member \$585

- o Operator Response Books available for purchase in packs of 10. (\$41.60/\$52 plus s/h)
- o Additional attendees from the same organization: Member \$125; Non-member \$155 (no kit)
