ADVANCED SAFETY CERTIFICATE

Job Safety Analysis

Tuesday, October 18, 2011

8:00 am – 4:00 pm

TRAINING GOALS

Job Safety Analysis (JSA) is a proven process for controlling operating hazards and costs. Get a step-by-step overview of the process, and define your role in making it effective. Through lecture, demonstrations, and workshops, you will learn how to develop and manage a JSA program in your workplace. You'll also learn how to enlist participation from line employees, supervisors, and upper management.

- Recognize and use important safety and health terminology
- Understand JSA's relation to continuous improvement in your organization
- Identify and communicate the safety and financial benefits of using JSA
- Gain support for and participation in the process from line employees, supervisors and upper management
- Identify the key requirements for a successful JSA
- Recognize the hazards inherent in task performance
- Develop appropriate solutions and hazard controls
- Complete a JSA form correctly
- Use JSA to develop efficient procedures that reduce personal injuries and operating costs

WHO SHOULD ATTEND?

Full-time safety practitioners, safety committee members, safety coordinators, safety specialists, human resources, safety managers, loss control managers and operations managers.

WHY SHOULD YOU ATTEND?

The result: Better processes make a safer workplace – and that means improved production and higher profits.

Call Chapter for information on other related courses, such as Incident Investigation, Safety Inspections, and Team Safety.

1 Day Course

0.6 NSC CEUs
