Achieve a competitive advantage in safety management

**DDC – Professional Truck Driver (DDC-PTD)
Train-the-Trainer Course (1 day course)
Monday, October 31, 2011**

DDC-PTD has always been the most comprehensive training course available for the professional truck driver, but with the revised format it's now the most flexible, too! The new format allows the trainer to easily customize the length and topics of the driver course for each audience and to address any company's specific equipment, driver issues, and policies.

Training Goal

- ❖ The DDC-PTD Train-the-Trainer one day course will teach you to be a thorough and versatile facilitator and provide you with the skills, knowledge, and materials to successfully teach the course. Our instructor will show participants how to determine the needs of the audience, improve classroom participation and interaction, handle objections, use activities effectively, and more.

Who should attend?

- ❖ Safety managers, fleet managers, and driving school instructors who want to develop or enhance their instructional skills and improve the effectiveness of their overall training delivery should all attend this course.

Why should you attend?

- ❖ DDC-PTD addresses all the issues important to the driver on-the-road. It was developed using input from drivers, fleet safety managers, educators, and insurance professionals nationwide. With insurance rates for the trucking industry skyrocketing, your organization can reduce costs and save lives by including DDC-PTD in your driver training program.

Topics covered in the trainer course include:

- ❖ How to use course materials
- ❖ Administrative responsibilities
- ❖ Adult learning needs
- ❖ Developing effective teaching skills
- ❖ Defensive driving technique
