Safety Training Methods

Monday – Thursday, February 6 - 9, 2012, 8 am – 5:00 pm

Gain the confidence and skills needed to create, select or evaluate safety training programs that truly engage employees and improve your organization's safety performance. In four days, you'll learn how to make educated decisions about the safety training needs of your workforce. You'll cover needs analysis, performance objectives, instructional strategy and methods, content, delivery evaluation and costs.

SMT meets ANSI Standard Z490.1-2009 criteria for accepted practices in safety, health & environmental training. This one course covers the issues you'll likely face as the person responsible for safety training in your organization.

WHAT YOU WILL LEARN

- The four basic needs among adult learners
- Five phases of the performance-based training process
- The ABCs of learning objectives & how to evaluate learning process
- Designing & developing a short training project for your safety or health setting
- Calculating direct & indirect training costs
- Identifying training & non-training solutions for safety & health issues in your workplace
- Facilitation skills to manage a challenging audience & make training meaningful

WHO SHOULD ATTEND?

You should attend if you are a manager, supervisor, human resource representative, or employee who is responsible for the planning, development and/or delivery of safety and health training programs.
